---

## SUMMARY

**Frontend-focused Full Stack Developer** passionate about UI/UX, leveraging React, NextJS, and modern web technologies to build scalable, user-friendly applications; Searching for a frontend-leaning role to bring expertise and work alongside top engineers in the field; Strong debugging, performance optimization, and attention to detail from a prior legal career

## EXPERIENCE

---

**Software Developer (Freelance)** – T2 Marketing Communications – Remote Apr 2025 – Present

- Builds and optimizes full-scale websites for multiple T2 clients using Next.js, Tailwind CSS, and Directus, while implementing SEO best practices to enhance search visibility and user acquisition.
- Collaborates with cross-functional teams, including design, engineering, and product management, to align project objectives and ensure timely, high-quality deliverables.
- Translates Figma designs into responsive, accessible, and pixel-perfect components, maintaining design fidelity across devices and browsers.

**Full Stack Developer** – Agility Consultants LLC – Remote Sept 2023 – Mar 2025

- Engineered SaaS web applications for a major federal agency, enabling secure and seamless agriculture data exchange across all U.S. states, territories, and federal government.
- Developed and refactored accessible, pixel-perfect user interfaces using JavaScript, React, and CSS, enhancing usability and overall user satisfaction.
- Resolved frontend issues, implemented robust error handling, and applied best practices to ensure scalable, maintainable, and high-performance applications.
